

Budgets & Forecasting

Real-time Insights to Keep your COGS on Track

Building a budget is a critical step in being able to manage food costs and keep your profits in your pocket.

Our cloud-based restaurant budgeting and forecasting software takes the guesswork out of managing to a budget.

It's tough to know you're going
if you don't know where you are.

Declining Budget Management

As you make purchases and digitize your invoice data using xtraCHEF, we automatically categorize and apply the purchases to your budget. This lets your team know how they're doing and how much budget they have left to spend before the end of the period.

POS Integration

We've developed integrations with Point-of-Sale (POS) systems in order to sync your daily sales and order data directly into xtraCHEF, giving you budget insight without having to manually input the data.

Flexible Time Periods

You can easily manage your budget based on the time period that works best for you. View the data by fiscal year, by calendar year, by quarter, by month and by week.

Daily Spend & Budget Health

View available budget amount left for the remaining days of the month or week. Our Budget Health emoji will quickly reveal whether your actual food cost ratio is on par with what you expected.
