Inventory Management

So Simple, You'll Look Forward to Taking Inventory

Everyone knows how important it is to manage inventory
to minimize waste, eliminate theft and closely control food costs.

The challenge is that most systems are difficult to set up
& require too much effort to manage and maintain.
xtraCHEF solved that problem.

Flexible Configuration

Shelf-to-sheet inventory in a way that best fits the way your run your restaurant. Set-up, schedule & assign individuals or teams by area & by time of day/week/month that works for you.

Online or Offline

Want to use paper? Not a problem! Print count sheets & enter later. But...with our interface, we're not sure you'll want to. No internet? No worries! We'll sync it when you're re-connected.

Automated & Accurate

Digitizing invoice data is what we do best. Automatically apply the last purchase price or an average of the most recent purchase prices to always have accurate inventory values.

Easy to Use

Drag-and-drop interface makes it easy to add products to areas and/or sub-areas. Started a count but got side-tracked? Auto-save! Just pick up where you or your teammate left off.

Connected to COGS

Beginning and ending inventory values are integrated w/ xtraCHEF's COGS Reporting & Analytics...giving you up-to-date, accurate insights on your Cost-of-Goods-Sold.

Order on Par

Getting low on apples? Easy as pie! xtraCHEF will automatically generate par level order guides when it's time to place an order.

We didn't invent inventory management software.
We just made it better.

## Inventory values that reflect reality

By automatically digitizing, itemizing & extracting line-item invoice data, the last purchase price or an average of recent purchase prices is automatically applied to your product or product group inventory values.

No more outdated count sheets

No need to spend hours adding new items to your count sheets. Every time xtraCHEF recognizes a new item, simply drag-and-drop to an area or add it to an existing Product Group.

Designed with end users in mind

An Inventory Management program is only as good as the quality of the data and the consistency of the effort. That's why we made it as easy and effortless as possible for operations teams to use.
