

# Cost Management & Analytics

We slice and dice your food cost data.  
You focus less on number crunching  
& focus more on insights to improve your business.

## Dynamic, Interactive Reports

Food cost ratios high this month? Prices spiking? Was it a vendor error? No need to guess. Drill-down into the details of our dynamic reports and dashboards...down to the line-item of your invoices.

## Keep Your Vendors Honest

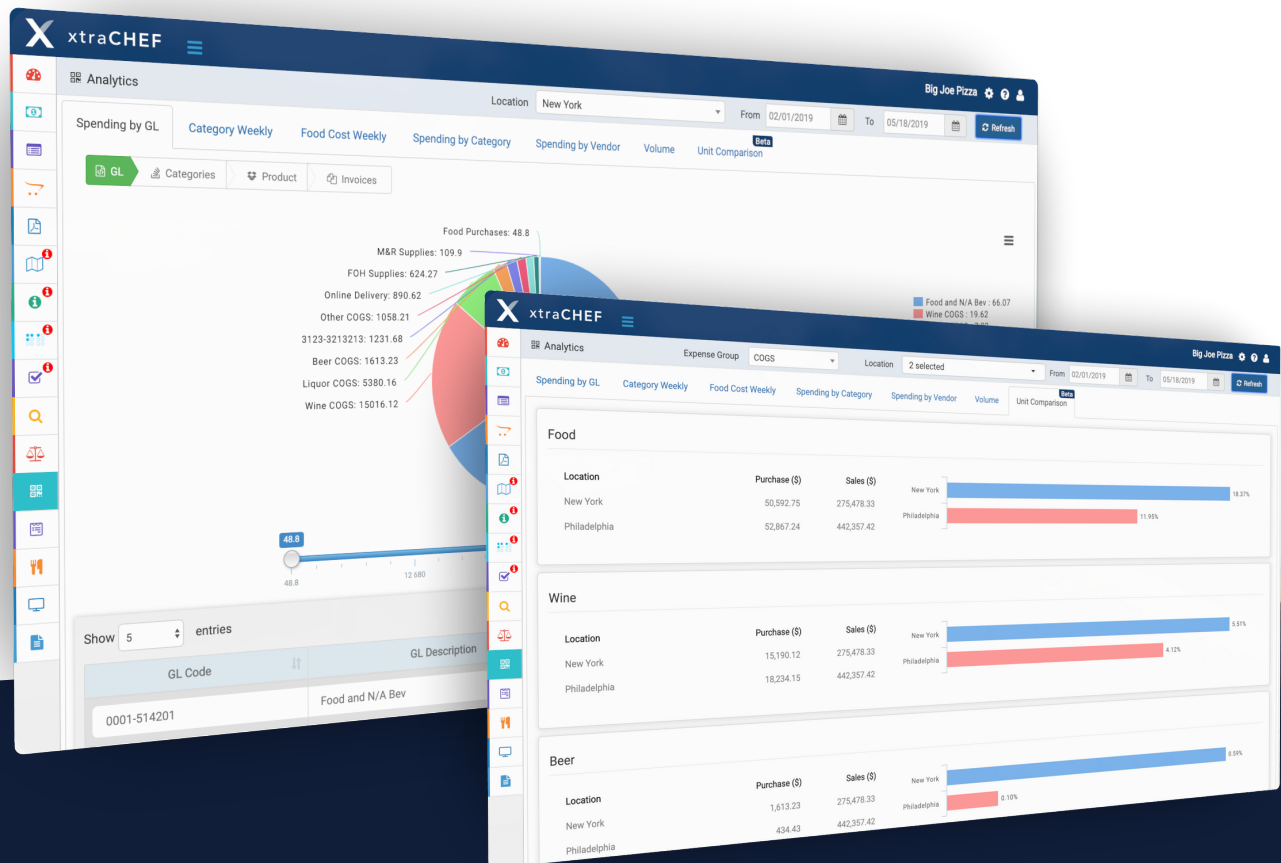

With our Price Tracker and Close Watch items, you can monitor contracted prices or the prices of your most volatile items to make sure you're getting the price you deserve.

## Compare Costs Across...

With xtraCHEF, you can compare costs across GLs, locations, vendors, similar items, and more.

Dynamic, interactive dashboards provide unprecedented visibility into your food costs – making it easier than ever to track, compare, and control your costs...while protecting your bottom-line.

**Don't Hate it. Automate it.**

Cost management features such as Configurable Price Alerts, Cost Trend Reports, Declining Budgets and more provide the transparency, oversight, and intelligent decision-making to remain profitable.
