

Restaurant365®

Eliminate data entry into **Restaurant365®**

More Accuracy, Less Time

We deliver invoice and inventory data that's consistently coded...faster, more cost-effectively and more accurately than any other option.

EDI Files Available Automatically

EDI files are automatically available within Restaurant365 from our FTP based on userdefined extract schedules.

Configurable Approval Workflows

Automatically route invoices to be approved based on user-defined rules prior to posting and payment in Restaurant365.

Invoice Image URLs

View and retrieve invoice images with just one click from within Restaurant365 - no unnecessary logins, passwords, or filing cabinets required

Vendor Statement Reconciliation

Automatically reconcile periodic vendor statements against invoice and credit data captured in xtraCHEF.

Deliver Accurately Coded, Line-item Invoice Data Directly to Restaurant365 with NO Data Entry

4 Ways to Capture Invoices & Vendor Credits using xtraCHEF

You can use our mobile app (available on iOS & Android), scan and upload in batches via our webapp, email or EDI to capture invoice data. You can also indicate vendor credits.

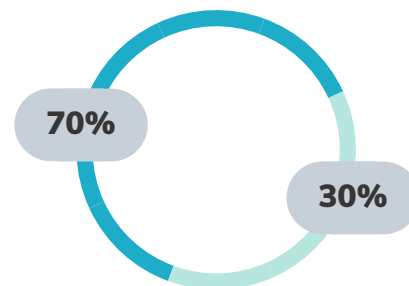

Line-item Level Details Configured to Your Preference

Using Inventory Management in Restaurant365? Our Product Verification feature is the ideal companion. We ensure your data is configured to the Pack, Size, and UOM that are suited to you - not your vendor's - preference.

Price Tracking & Cost Intelligence Dashboards

Configurable Price Alerts, Cost Trend Reports, Declining Budgets and more provide the transparency, oversight, and intelligent decision-making to remain profitable.
