

Eliminate data entry into

More Accuracy, Less Time

We deliver invoice and inventory data that's coded consistently faster, more cost-effectively and more accurately than any other option

EDI Files Available Automatically

EDI files are automatically available within ChefTec from our FTP based on userdefined extract schedules

Configurable Approval Workflows

Automatically route invoices to be approved prior to posting data to ChefTec based on user-defined rules

Invoice Image URLs

View and retrieve invoice images with just one click from within ChefTec - no unnecessary logins, passwords, or filing cabinets required

Vendor Statement Reconciliation

Automatically reconcile periodic vendor statements against invoice and credit data captured in xtraCHEF.

Deliver Accurately Coded, Line-item Invoice Data Directly to ChefTec with NO Data Entry

4 Ways to Capture Invoices & Vendor Credits using xtraCHEF

You can use our mobile app (available on iOS & Android), scan and upload in batches via our webapp, email or EDI to capture invoice data. You can also indicate vendor credits.

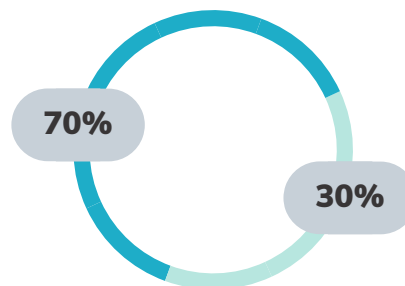

Line-item Level Details Configured to Your Preference

Our Product Verification feature is the ideal companion. We ensure your data is configured to the Pack, Size, and UOM that are suited to you - not your vendor's - preference.

Price Tracking & Cost Intelligence Dashboards

Configurable Price Alerts, Cost Trend Reports, Declining Budgets and more provide the transparency, oversight, and intelligent decision-making to remain profitable.
